

End User License Agreement

PGC-1000

Article I. Grant of license

Subject to the provisions contained herein, plc2 Design GmbH, Ersteiner Straße 19, 79346 Endingen a. K., Germany, or an affiliate of plc2 Design GmbH (hereinafter collectively referred to as »licensor«), either directly or through a designated plc2 Design reseller, hereby grants to the licensee a non-exclusive, timely unlimited, non-transferable, non-sublicensable, revocable right to

use PGC-1000 and its software libraries and driver (hereinafter referred to as »software«) and any materials provided to the licensee by licensor in connection with the license grant, such as documentation and demonstration material.

Licensee shall be entitled to make archival and/or backup copies of the software.

Article II. Restrictions on use

Licensee shall - except as expressly agreed between the parties in writing or as permitted in this agreement - not, (i) use or copy the software; (ii) modify, adapt, translate, reverse engineer, decompile, disassemble the software or create derivative works thereof; (iii) rent, lease, sublicense, transfer, or distribute the software or grant

any rights to use it. Depending on the license model (e.g. machine-based, user named, floating) agreed upon between the parties in the individual case, usage may be restricted to a certain number of simultaneous executions of the software.

Article III. Proprietary rights of licensor

Licensor retains all rights, title and interest in the software, including any modification, updates, improvements, enhancements or extraction thereof. The licensee acknowledges that licensor retains exclusive ownership and

title in the trademarks represented by its company name and logo as well as product names. The licensee will not remove, delete or modify any copyright or other proprietary notice or any other attributions from the software.

Article IV. Limited warranty policy, limited liability

The use of software shall be subject to the warranty and liability provisions set forth in the applicable terms and conditions or as agreed upon between the parties.

If the license grant is provided free of charge, the licensor assumes warranty only for defects as to quality and defects in title if and to the extent that it has maliciously concealed any such defect as to quality or in title. Beyond this, the licensor, its legal representatives and vicarious agents shall only be liable for damages resulting from deliberate or grossly negligent misconduct of the licensor. Claims in accordance with applicable product liability

laws shall remain unaffected.

The licensor does not accept liability for damages resulting from improper operation (which is not in accordance with the software specifications) or operation in a manner that is contrary to this agreement. Any risk arising from the use or performance of the software shall lie with the licensee. The licensee shall be responsible to verify and secure any results obtained from the use of the software, in particular with respect to accuracy, safety and security.

Article V. Licensee's submission

This agreement does not obligate the licensee to provide licensor with materials, information, comments, suggestions or other communication regarding the software. However, the licensee agrees that any material, information, comments, suggestions or other communication the licensee transmits or posts to licensor (including but not limited to, submissions to licensor's 1st level support and/or other customer support websites or online portals) or provide to licensor under this agreement related to the features, functions, performance or use of the software are deemed non-confidential and non-proprietary („communications"). Licensor will have no obligations with respect to the communications.

The licensee hereby grants to licensor, its subsidiaries and affiliates, a non-exclusive, perpetual, irrevocable, royalty-free, worldwide license to copy, modify,

create derivative works, publicly display, disclose, distribute, license and sublicense through multiple tiers of distribution and licensees, incorporate and otherwise use the communications and all data, images, sounds, text, and other things embodied therein, including derivative works thereto, for any and all commercial or non-commercial purposes.

Nothing in this agreement will be construed as preventing licensor from implementing independently developed enhancements to licensor's own error diagnosis methodology to detect errors or defects in licensor's products discovered while reviewing communications or to implement bug fixes or enhancements in licensor's products. The foregoing may include the right to include communications in regression test suites.

Article VI. Third party programs

The software may contain third party programs or materials that are governed by third parties' license terms, including without limitation, open source software. Comprehensive information about such third party programs or materials as well as any applicable license terms may

be found in the open source software attributions document, which is part of the software delivery. By installing and using the software or any part thereof, the licensee accepts any applicable third party license terms.

Article VII. Compliance with law, export controls

The licensee agrees to comply with all applicable export laws and restrictions and regulations of the European Union, the United States or any other relevant foreign agency or authority. The licensee agrees not to export, or allow the export or re-export of the software, in violation

of any such restrictions, laws or regulations. The licensee represents and warrants that it is not located in, under the control of, or a national or resident of any restricted country and that it is not listed on any EU or U.S. Government list of prohibited or restricted parties.

Article VIII. Miscellaneous

In the event any part of this agreement is invalidated by court or legislative action of competent jurisdiction, the remainder of this agreement shall remain in binding effect. This agreement may only be changed by mutual written consent.
